

PROTIME RC TRANSPONDER

Protime RC Transponder

- For active sports
- Maximum detection Speed 120 km/h / 75mph
- Disposable 3 V battery

Description

The RC Transponder is dedicated to low velocity sports, such as active sports (cycling, speed- and roller-skating, running based sports) , cross-country skiing and rental karting races.

The RC transponder is supplied with a disposable lithium cell 3V battery.

With its small dimensions, the RC can easily and comfortably be worn on a belt, on the wrist or the leg or positioned on the chain stay of the frame of a bicycle.

The integrated LED flashes every time the RC crosses the active detection loop to indicate the correct operation of the transponder
