## 1. Concept

---

The Pocket Pro Pilot App, Pocket Pro HL400-P, provides flight times and fuel times for pleasure and general aviation pilots.

Thanks to the 2 specific modes, the pilot can record and monitor flight time and fuel time consecutively (up to 100 flight times memorized).

The Pocket Pro electronic stopwatch is the latest in TAG Heuer's Professional Timing development regime. In addition to the three exclusive timing modes dedicated to General Aviation and Pleasure pilots, this 1/100th second handheld timepiece also encompasses standard stopwatch modes, including Split / Lap time measurement, countdown, and timing based on time of day.

Together with its integrated USB connector; free POCKET MANAGER Application and Pocket-Pro 800 measurements internal memory, the device makes the downloading, analysis, printing and archiving of results extremely simple.

Results can also be viewed or printed from your laptop or pc instantly.

**Note:**

Pressing the hard reset (to the right of the USB connector) resets the Lock Time value to 0.01 sec (minimum)

## 2. Standard Timing Mode

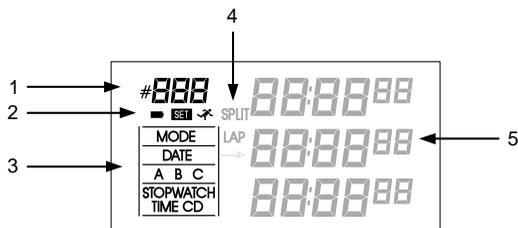

---

Several standard timing modes are available including:

**Date / Time / Count Down / Stopwatch**

More specific event orientated modes are also available, see section 3

### 2.1. LCD description

1. Sequence Number of athlete / Memory status
2. Battery / Mode Setting / Running status
3. Timing Mode
4. Information Split / Lap
5. Timers

### 2.2. General

#### 2.2.1. How to navigate the different modes

To navigate into a different mode:

- First the Pocket Pro has to be stopped (**STOP**)
- Reset memory (**START/STOP + MEMORY**)
- Pressing the **MODE** button now allows you to change the Timing Mode

Sequence:

**DATE → STOPWATCH → TIME → CD → A → B → C**

### 2.2.2. Power

The Pocket Pro functions with an internal battery. It can be recharged when by connecting to a PC (USB cable) or by a (USB – 5VDC) power supply

When not used for 36hours, the Pocket Pro will switch OFF automatically (LCD OFF)  
To wake up the Pocket Pro, just press any button

It is also possible to switch OFF manually the Pocket Pro by simultaneously pressing the **MODE** and **MEMORY** buttons for 5 seconds

When the Pocket Pro is OFF, all the times are stored in memory

The icon  will indicate the level of the battery

During charge: 75% ON / 25% OFF blinking

Fully charged: with USB Cable: icon ON  
Without USB cable: icon OFF

Low level (<10% charge): blinking 50% ON & 50% OFF  
(you still have 2-3 days autonomy)

### 2.2.3. Time Memory

The Pocket Pro has a memory of 800 stored times

The number of memorized times is shown on the 3 digits (Memory status)

When the memory reaches 90% capacity (720 times), the 3 digits will flash

#### **Warning**

Once the memory is full (800 times), the next time recorded will be stored as 001 automatically overwriting the original time

The memorized time can be recalled and displayed on the LCD at any time (even during a timing session)

By pressing the **MEMORY** button, the memorized time 001 will be displayed as the button is held down. The number of the memory shown is displayed on the top-left of the LCD

Press the **MEMORY** button again and the next stored time will be displayed

### 2.2.4. Delete Memory

To delete the memory, press simultaneously **START/STOP** and **MEMORY** buttons

#### Warning

You will **not** receive a request for you to “confirm Delete Memory”!  
Once this step is made, all times are irretrievably deleted

### 2.3. Date Mode

This mode allows you to update the date of the Pocket Pro

To set the date:

- Press the **MEMORY** button: the first digit will flash and **SET** icon is ON
- Press the **SPLIT/LAP** button to change the value
- Press the **MEMORY** button to move to the next digit

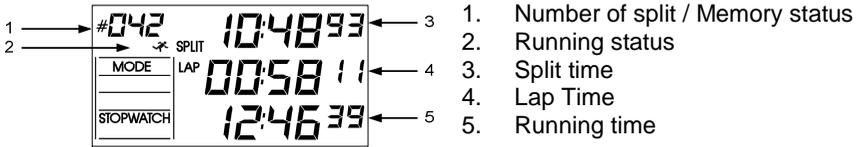

Validate your setting with the **MODE** button (**SET** icon is OFF)

1. Icon Set ON = Setting
2. Day/Month (red digit blinking 25.03)
3. Year setting (2013)
4. Time of Day (set in menu TIME)

## 2.4. STOPWATCH mode

This timing mode allows the timekeeper to make a Start/Finish, with split time (**SPLIT**) and lap time (**LAP**) with 1/100th second precision

The time displayed is up to 59'59.99" (1 hour)

**SPLIT** : Split time, or cumulative time (**SPLIT/LAP** button)

**LAP** : Lap time (**SPLIT/LAP** button)

**Running Time** : Running time between Start and Finish

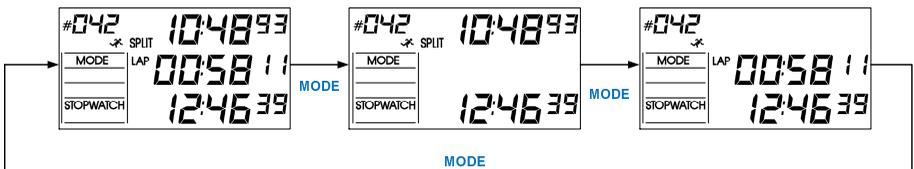

The running time always starts from **00:00:00**

- To start, press the **START/STOP** button (☒ icon is ON)
- Three times are running and displayed
- To record a Split / Lap, press **SPLIT/LAP** Button

The **SPLIT** and **LAP** time is stopped. The running time (bottom) continues to run

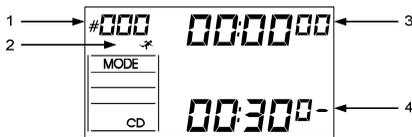

At each press of the **SPLIT/LAP** button, the memory sequence increases  
 It is possible to recall and view previous split and lap times during a session by pressing the **MEMORY** button

For simple viewing in this mode, it is possible to reduce the information, and display only **SPLIT** or **LAP**. For this, during the race, press the button **MODE**

## 2.5. Count Down mode (CD)

This mode allows you to make a unit count down or loop count-down

1. Number of split / Memory status
2. Running status
3. Counter
4. Count Down (max 59:59.9)

### 2.5.1 Set Count Down

To change the Count-Down value, the memory first has to be deleted

To set the Count-Down value:

- Press the **MEMORY** button: the first digit will flash and **SET** icon is ON
- Press the **SPLIT/LAP** button to change the value
- Press again the **MEMORY** button to change to the next digit
- Validate your setting with the **MODE** button (**SET** icon is OFF)

#### 2.5.1. Count Down timing

- To start the count down, press **START/STOP** button (✓ icon is OFF)
- The count-down value decreases (on the bottom line)
- A timer (on the top) is started (increases)

At any time it is possible to **PAUSE** and **RESTART** the count-down

A long single beep will sound at the end of the Count-Down

The count-down will stop automatically at 00:00

To restart a new count-down, you have to reset the value by pressing the **SPLIT/LAP** button

During the count-down sequence, by pressing the **MODE** button, it is possible to change the Single Count-Down to Auto-Restart Count-down (loop mode)

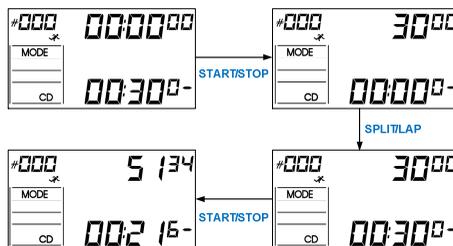

The **CD** icon on the LCD will switch

In this Auto-Restart Count-Down, during the last 5 seconds, the Pocket Pro will sound a single short beep and a then long beep at 00:00

The Pocket Pro will restart automatically from the pre-defined time of the count-down

The timer will run and show the full time since the first Start

To stop the sequence, you have to **RESET** the Pocket Pro

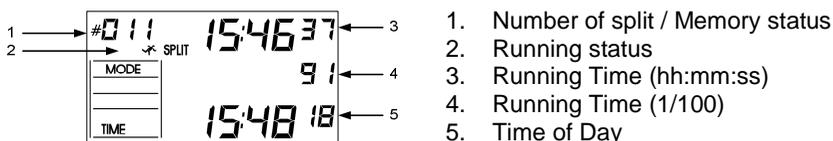

## 2.6. TIME Mode

This timing mode allows you to memorize the time of day at each split

This mode is very useful as a back-up system during a timing session and functions similarly to other timing systems working at “time-of-day” such as the CP545 Chrono-Printer, Mini Timer or Start Clock

In Time mode, you have the running time on the top line of the LCD and the time of day on the bottom line of the LCD

### 2.6.1. Internal Time of Day setting

To set the Internal Time of Day on Pocket Pro:

- The Pocket Pro memory has to be reset (**START/STOP + MEMORY**)
- Press and hold the **MEMORY** button for 5 sec: the first digit will flash and **SET** icon is ON
- Press the **SPLIT/LAP** button to change the value
- Press the **MEMORY** button to move to the next digit

### 2.6.2. Time of day synchronisation

- Press **SPLIT/LAP** and **START/STOP** buttons simultaneously
- The time of day of the Pocket Pro will be displayed on the top of the LCD with 1 minute in advance
- The synchro will be automatic at the end of the full minute

### 2.6.3. To Synchronise at Zero

- Press **START/STOP** button

The time automatically starts from zero

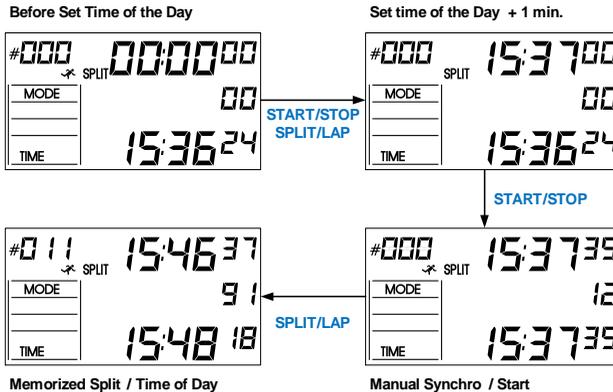

### 2.6.4. Timing

Once the Synchronization is made, the  icon appears

To memorize the time of day, press the **SPLIT/LAP** button

The time on the LCD will stay and the passing counter (top-left) is increased

To see the time of the day running, press the **MEMORY** button

## 3. Specific Pilot Timing Modes

In the Pocket Pro Pilot, 2 specific modes are available

### A: Flight Time

In this mode, it is possible to record and monitor flight time with the date/time of take-off and date/time of landing.

Up to 100 flights can be stored on the Pocket Pro.

### B: Tank operating time.

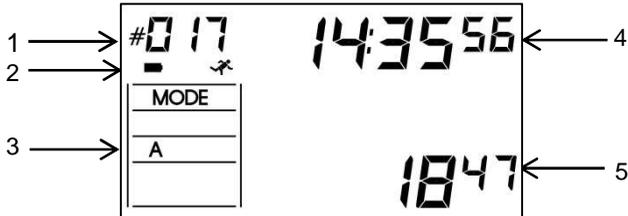

This mode enables the Pilot to define up to 6 fuel tanks. For each of them, it is possible to set a count-down value, and reset them individually.

### Specifics of Pocket Pro Pilot :

- Pocket Pro Pilot enables the user to use mode A and B simultaneously: It is also possible to switch between A and B and vice versa, to monitor either the fuel tank timer or flight timer as required.
- Reset Mode A or B, will erase only the time and information of the present mode (reset : start/stop + Memory)
- It is possible so start and Stop the two modes A and B simultaneously from Mode B only

### 3.1. Flight Timer (mode A)

In this mode, it is possible to record and monitor the time of take-off and landing for each flight. Pocket Pro Pilot stores the information of every flight (up to 100) including date/time of take-off and date/time of landing.

1. Flight number (consecutive number until reset)
2. Battery / Mode Setting / Running status
3. Timing Mode
4. Time of day
5. Flight Time (hh:mm:ss)

Button **Start/Stop**: Take-off / Landing (start / finish)

Button **Split/Lap**: Change flight number (after landing)

Button **Memory**: Recall previous flight time history.

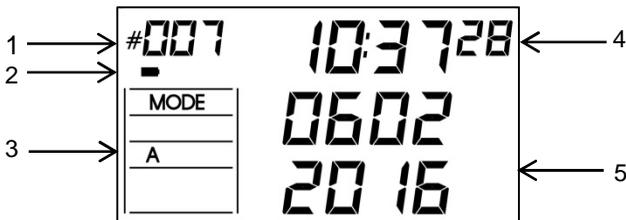

Button **Memory** + **Start/Stop**: Erase memory of Flight times (Mode A only)

Mode A, without flight time running, the LCD displays the date & time of day.

It is recommended to update the time of day regularly (see chapter Time and Date)

During flight, time can be paused with “fly back” function – press the button **Start/Stop**

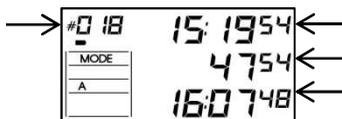

Flight time will be stored only when the next flight is incremented (button **Split/Lap**).

1. Flight Number
2. Battery / Mode Setting / Running status
3. Timing Mode
4. Time of day
5. Date (06/02) – 6 February, Year (2016)

## Memory Recall Button

Thanks to the **Memory** button, it is possible to see the latest flight time memorized

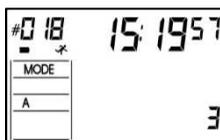

1. Flight Number
2. Take-Off time
3. Flight time (hh:mm:ss)
4. Landing Time

Using the Pocket Pro manager software utility will also provide date of all flights.

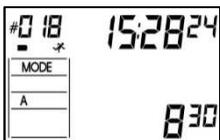

### Example

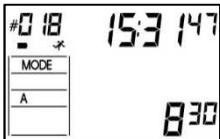

Mode A  
Time of day (15 :18 :35)  
Date : 24.10.2015

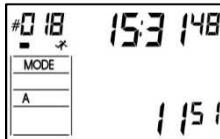

Button **Start/Stop** – Take off and Landing  
Sequence Number of the flight : 018  
Time of day (15 :19 :57)  
Flight time (3 sec)

Button **Start/Stop** – Stop of flight time  
Time of day : 15 :28 :24  
Stop time at 8'30"

Time of day : 15 :31 :47  
Flight time : 8'30" (frozen)

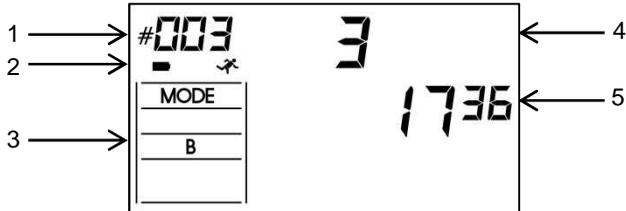

Button **Start/Stop** – Restart  
Time of day : 15 :31 :48  
Flight time : 11'51" (fly back function)

Button **Start/Stop** – Landing  
Time of Landing : 16 :07 :48  
Button **Split/Lap** (memorization)  
Time of day (16:07:48)  
Date : 24.10.2015

### 3.2. Fuel Timer (mode B)

The Fuel Timer mode gives the ability to define up to 6 individual tanks. For each of the tanks, it is possible to define the maximum time (count-down value), and reset them individually

1. Fuel Tank in process
2. Battery / Mode Setting / Running status
3. Timing Mode
4. Number of the tank display on LCD
5. Count down value of the tank

#### Functions

Button **Start/Stop** : Start / Stop count-down of the selected fuel tank

Button **Start/Stop**: Press and hold for a minimum of 5 sec, allows to start or stop simultaneously mode A (flight Time) and B (Tank)

Button **Split/Lap** : Select tank number

Button **Memory** : Press and hold for 5 sec  
Reset the select count-down and set menu

Setting of a count-down value

When the mode B is totally reset (button **Start/Stop + Memory**), **all the values will be deleted on the Mode B**, it is possible to set up to a 6 tank count down. With the Pocket Pro stopped, it is possible to change individually the settings of each count down.

- Button **Memory** : To change the digit  
Button **Split/Lap** : To change the value

Thanks to the Pocket Pro Manager, it is possible to easily define each count-down value for each tank.

## Start/Stop simultaneously: Mode A and B

From the mode B (tank), it is possible to simultaneously start / stop the flight time fuel timer.

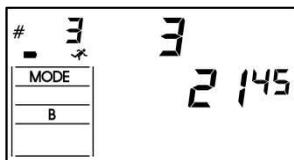

Press the **Start/Stop** during 5 sec mini from Mode B only.  
The message "Start" will be displayed on the LCD.

To stop simultaneously the mode A and B, press the Start/Stop button for 5 seconds.  
The message "stop" will be displayed on the LCD.

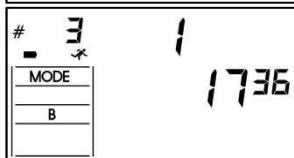

Some caution for Start / Stop simultaneously

- Can only be from mode B (tank), to manage before the tank number which is engaged
- After a stop simultaneously, Mode A will remain in «fly back » mode. The flight is not memorized and request a manual operation from mode A (button **Split/Lap**)

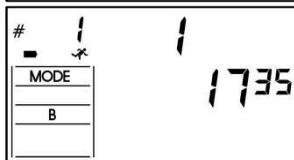

## How to change tanks

Tank #3 is running  
Visualization of the tank 3  
Count-down value: 2'45''

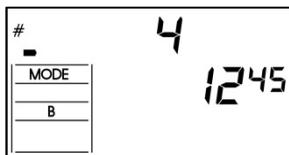

Button **Split/Lap**  
Visualization of tank n° 1  
Value : 17'36''

Button **Start/Stop**  
Stop count-down of the tank n° 3  
Start count-down of the tank n° 1

## How to reset (default value) of each individual tank

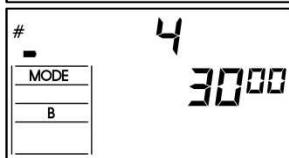

The Pocket Pro has be stopped.

The Pocket Pro has to be stopped (# without number)

Button: **Split/Lap** to select tank : n° 4

Count-down value: 12'45''

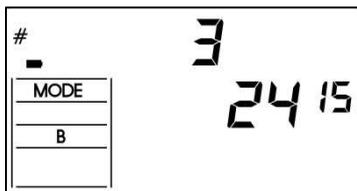

Holding 5 sec the **Memory**

The default value of the count-down is displaying (30')

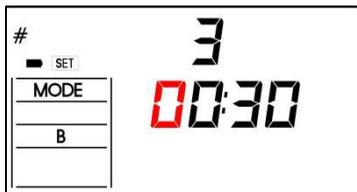

It is possible with button Memory and Split/Lap to change the setting

## Change the default value for each tank

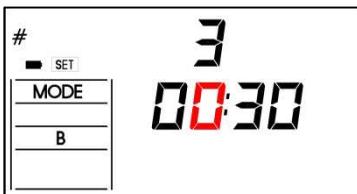

The Pocket Pro has to be stopped

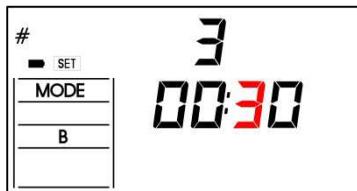

The Pocket Pro has to be stopped (# empty)  
Button **Memory**  
Selection of the tank (n°3)

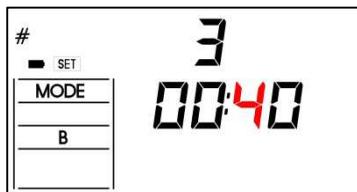

Hold 5 sec the button **Memory**  
Change the mode in setting  
The value comes back to original (as reset) (30')  
The first digit is flashing (in red on this document)  
Release all buttons

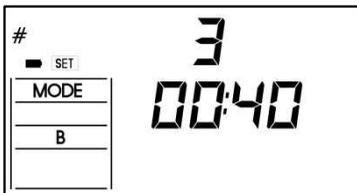

Button **Memory**  
Change the digit (in red on this document)

Button **Memory**  
Change the digit (in red on this document)

Button **Split/Lap**  
Change the value of digit

Button **Mode**  
Validate your new selection (40')

## 4. Recommendations

---

Although the Pocket Pro can be used indoors and outdoors, optimal viewing and protection is best when the display is in the shade or covered from direct sunlight and rain

Never immerse the Pocket Pro in water

The Pocket Pro is developed to endure light rain.

The USB socket is protected by the black rubber, and prevents any water ingress

It is very important and recommended to keep the rubber in place at all times when not using the USB connection

The optimal visibility of LCD is when the Pocket Pro is protected from direct sunlight

The Pocket Pro can overheat in excessive direct sunlight

The LCD Plexiglas is fragile. It is not recommended to clean it with a solvent or alcohol

### **IMPORTANT**

A slightly damp cloth is recommended for cleaning the Pocket Pro

## 5. Download a new version of Firmware

---

Program downloads and new releases of the TAG Heuer firmware “up loader” are available free of charge on our website [www.tagheuer-timing.com](http://www.tagheuer-timing.com)

For this operation, you need to have:

- Mini-USB cable HL545-3
- The software «TAGHeuerFirmmanager.exe » version minimum V10.0

### **Procedure**

- Copy the software «TAGHeuerFirmManager.exe » onto your hard disk drive
- Connect the Mini-USB cable (HL545-3) to the PC and to the Pocket Pro
- Run the software « TAGHeuerFirmManager.exe »
- Select the COM Port
- Select the file: Update (HL400\_xxx.dat)
- Press START on the software
- Press and hold the reset button on Pocket Pro and release when prompted
- As soon as the upgrade is downloaded into the HL400, validate the software with OK
- The HL400 is ready to use

## 6. Technical specification

---

### 6.1. Pocket Pro characteristics

- Power 5 VDC (rechargeable with USB cable)
- Internal battery 600mAh / 3.7V
- Autonomy 35 days (in use) after full charge
- Shell Aluminium – PVD surface treatment
- Weight 160 g
- Precision +/- 2 sec / month  
Calibration available
- Display LCD 3 lines of 6 characters  
Battery level / Timing Mode
- Size of characters 7mm height
- Accuracy 1/100<sup>th</sup> second
- Memory 800 stored times
- Temperature range -20°C to +60°C

### 6.2. USB Connector

Pin	Description
1	5V
2	D-
3	D+
4	TAG Heuer Photocell
5	GND

## 7. Quick Guide

---

### Reset memory

Buttons: Start/Stop + Memory

### Change mode:

Clear Memory (Start/Stop + Memory)

Button: Mode

### Power off

Buttons: Memory + Mode (hold down together for 5 seconds)

### Recall recorded times

Button: Memory

### Setting (Date / Time / CD)

Button: Memory to select the digit

Button: Split/Lap to change value

Button: Mode to validate the selection

### Stopwatch

Button: Start/Stop: start or stop counter

Button: Split/Lap: memorize Split/Lap

Button: Mode: select display Split or LAP or both

Button: Memory: recall split/lap memorized

### Count Down

Button: Start/Stop: Start or Stop counter

Button: Split/Lap: reset the preselected Count Down

Button: Memory: countdown setting

Button: Mode: Select single Count Down or Multi Count Down (CD blinking)

### Time (function manual back-up with Time-of-Day)

Button: Start/Stop + Split/Lap: Set Time-of-Day (+ 1 minutes)

Button: Start/Stop: Synchro + Start

Button: Split/Lap: Memorize Time-of-Day

Button: Memory: recall/view memorized time

### Mode A

Button Start/Stop:

Take-Off and landing (Start/Finish)

Button Split/Lap:

Change flight number (next flight, after landing)

Button Mode :

Switch Mode (A → B)

### Mode B

Button Start/Stop

Count-down start of the selected tank

Button Start/Stop

Hold during 5 sec: Start and Stop simultaneously Mode A and B

Button Split/Lap

Change selection of the tank

Button Memory

Press and Hold for 5 sec: reset / setting

In setting mode (Memory hold down for 5 sec)

Button Memory

Change digit

Button Split/Lap

Change digit Value
