START GATE HL 7-1P / HL 7-3

Start Gate

HL 7-1P

« A professional accessory, fruit of our experience in World Cup »

- In accordance with FIS requirements, the HL 7-1P Start Gate features two isolated timing contacts
- While closed, the start gate is prevented from accidental opening caused by minor knocks and bumps through the use of the blocking feature
- Backing action built into the wand mechanism camshaft is very effective at eliminating unwanted rebound action after opening
- The wand (HL 7-114) is very rigid and thus highly accurate but durable product. It is installed by inserting it through the rear of the shaft holder and is held in place by a spring-mounted bearing ball.
- Precision : 1/1'000 sec

Recommended use

- Specially recommended for the FIS races

Automatic return Start Gate

HL 7-3

- The HL 7-3 Start Gate features one isolated timing contact.
- An internal spring brings the start gate wand back into the start position after each opening.
- While closed, the start gate is prevented from accidental opening caused by minor knocks and bumps through the use of the blocking feature
- Backing action built into the wand mechanism camshaft is very effective at eliminating unwanted rebound action after opening
- The wand is very rigid and thus highly accurate but durable product. It is installed by inserting it through the rear of the shaft holder and is held in place by a spring-mounted ball bearing.

Recommended use

- For training or for automated racecourses
- It is not allowed for FIS race use
